Rules
 Tables should be set for groups of four and the youngest player starts. Play moves in a clockwise direction. You must score a five to draw the upper body before you can draw the scarf, arms, buttons and head similarly you must score a 6 to draw the head before you can draw the hat. You need to draw snowman parts by rolling the correct number as shown, you will have to roll two separate 3's as there are two arms, two separate 5's as there are two body parts and 4 separate 4's as there are 4 buttons. The first person to complete a full snowman shouts "SNOWMAN" and scores the maximum 11, everyone else needs to count how many parts they have drawn to calculate their score
