UK Leaves and the Trees They Belong To

Look at the leaves and find out which tree they come from. Each leaf is different. Colour the leaves and trees.

Oak

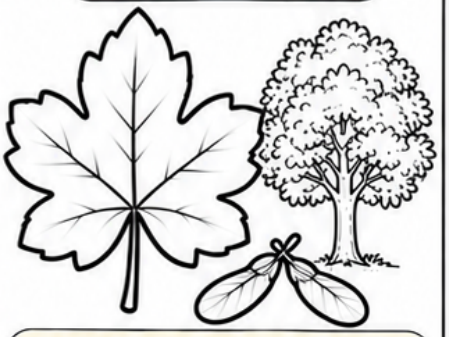

Oak leaves have rounded lobes. Oak trees can live for hundreds of years.

Sycamore

Sycamore leaves usually have five pointed lobes. Their winged seeds spin as they fall.

Field Maple

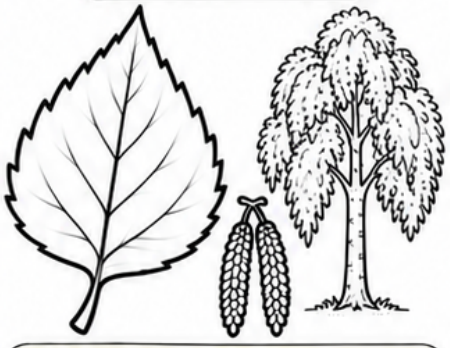

Field maple leaves have five broader, rounded lobes. The leaves turn yellow or orange in autumn.

Beech

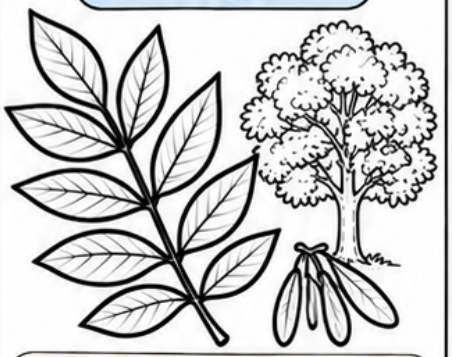

Beech leaves are oval with smooth, wavy edges. Young beech trees often keep their brown leaves through winter.

Silver Birch

Silver birch leaves are triangular with a toothed edge. Birch trees have white, papery bark.

Ash

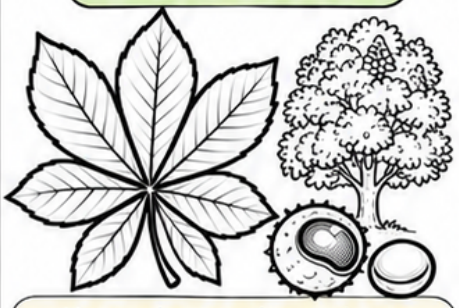

Ash leaves have several leaflets on one stem. Their seeds are called keys.

Rowan

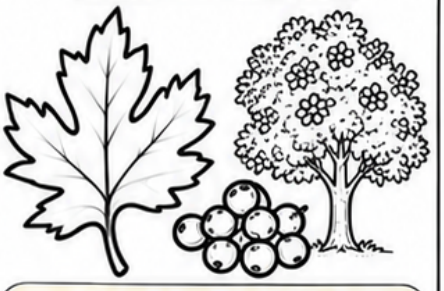

Rowan leaves have narrow leaflets. Their bright red berries are loved by birds.

Horse Chestnut

Horse chestnut leaves have 5 to 7 leaflets. The tree produces shiny brown conkers.

Hawthorn

Hawthorn leaves are small with deeply cut, irregular lobes. The tree produces red berries called haws.
